

DAOSquare

Incubator
for
Web3

LIGHT PAPER 1.0

08.15.2021

About DAOSquare

DAOSquare was born out of MetaCartel, a famous Western DAO community, and has been deeply inspired by the vision of MetaCartel and Moloch. DAOSquare has now grown to become the most influential DAO in China and the greater Chinese area.

Incubator for Web3.0

We are all part of the wave of innovation that Web 3.0 is bringing to the world.

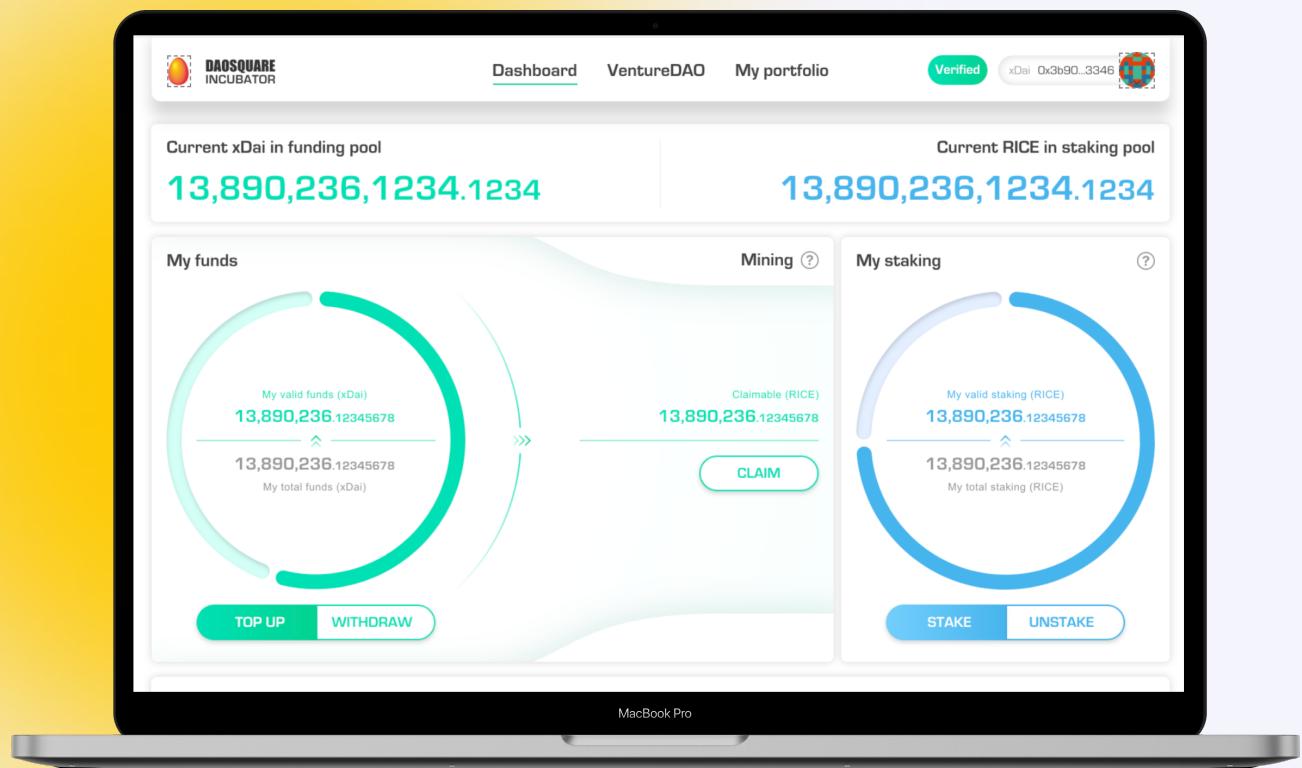

Today, crypto infrastructure development is accelerating at a rapid pace. We are all witnesses to a Cambrian explosion of applications. This wealth of opportunity and multitude of applications means that there are and will be a vast amount of opportunities for startups and fundraising. In the Web 2.0 era, incubators like Y-Combinator guided many innovators from nothing to absolute successes. DAOSquare can inherit and bring forth the same with support and cultivation for Web 3.0.

Architecture

The DAOSquare Incubator supports innovators in three ways:
Funds (VentureDAO), Products (mentor, incubation camp),
Growth (market, community, listing, etc.).

VentureDAO

How can DAOSquare achieve a positive-sum game? How can DAOSquare achieve a non-cooperative game?

The VentureDAO, a core part of DAOSquare incubator, is the coded realization of these visions. It consists of three decoupling modules: a Fund Pool, Governance, and Vesting. Specifics of the mechanism design will be revealed shortly that expands upon the picture above. These mechanisms seek to build a network that benefits all stakeholders.

Community

The screenshot shows the DKP dashboard. At the top, there's a banner featuring a purple dragon illustration and the DKP logo. The main navigation bar includes 'Home' (which is underlined in green), 'Pools', and 'Inventory'. A user profile icon is in the top right corner. Below the banner, there are two main sections: 'OVO Donation' and 'Task'. The 'OVO Donation' section shows a yellow circular icon with a red outline, labeled 'DKP1', and the text 'Donate JTT in OVO Grants to get DKP'. It displays 'Total JTT' as 338,968.00 and 'My DKP' as 330.00, with a 'DONATE' button and a gift icon. The 'Task' section shows a blue circular icon with a white outline, labeled 'DKP2', and the text 'Stake ATT / finish tasks for DKP2'. It displays 'My staking ATT' as 10,000.00 and 'My DKP' as 724.48, with a 'STAKE' button and a gift icon. There are also 'Show all >' links for both sections.

Building a Real Community

In the Web3 era, success depends on whether you have a real community. A community is not only a group but a coalition where value can be created together.

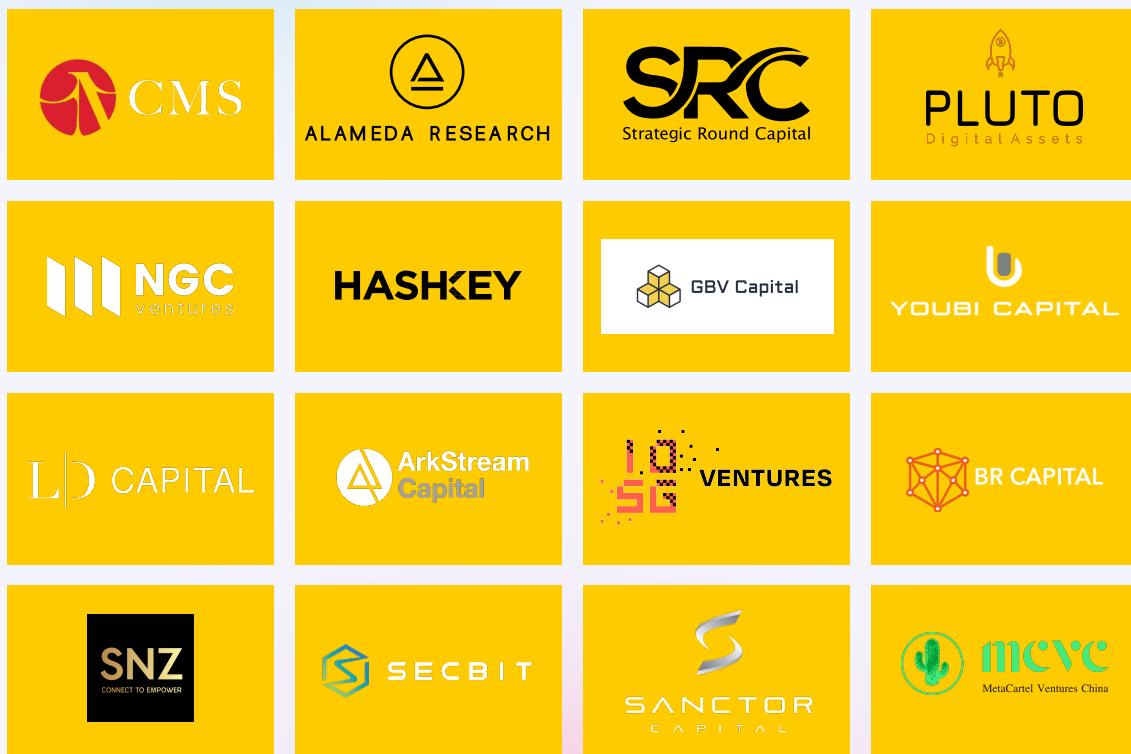

DKP (DAO Kontribution Protocol) is a permissionless community contribution protocol. This system expresses our beliefs in the community (DAO) governance and growth. Through DKP, the appropriately incentivized people can be gathered who will truly work to move DAOSquare forward. These co-builders will eventually become owners of DAOSquare. DKP will also be open to all projects and communities to help better achieve community construction and growth. You can now access DKP through the link below:

\$RICE

Allocation of DAOSquare's Token

Total: 100,000,000 RICE

Last Updated 20210423

\$RICE is the symbol of DAOSquare's Governance Token. The total circulation of \$RICE is 100 million. Token contract address:

[Ethereum Mainnet] [0xbd9908b0cdd50386f92efcc8e1d71766c2782df0](https://etherscan.io/address/0xbd9908b0cdd50386f92efcc8e1d71766c2782df0)

[xDai] [0x97Edc0e345FbBBd8460847Fcfa3bc2a13bF8641F](https://xdai.info/address/0x97Edc0e345FbBBd8460847Fcfa3bc2a13bF8641F)

Note: \$RICE is currently not listed on any exchanges, please be mindful of any false listings!

\$RICE symbol

Token Utility

Staking

Holding \$RICE is a critical requirement for participation in DAOSquare. Participants are required to stake \$RICE to acquire rights for the interests of the VentureDAO and DKP. These include rights like private-equity, public offering shares, DAOSquare governance rights, and more.

Reward

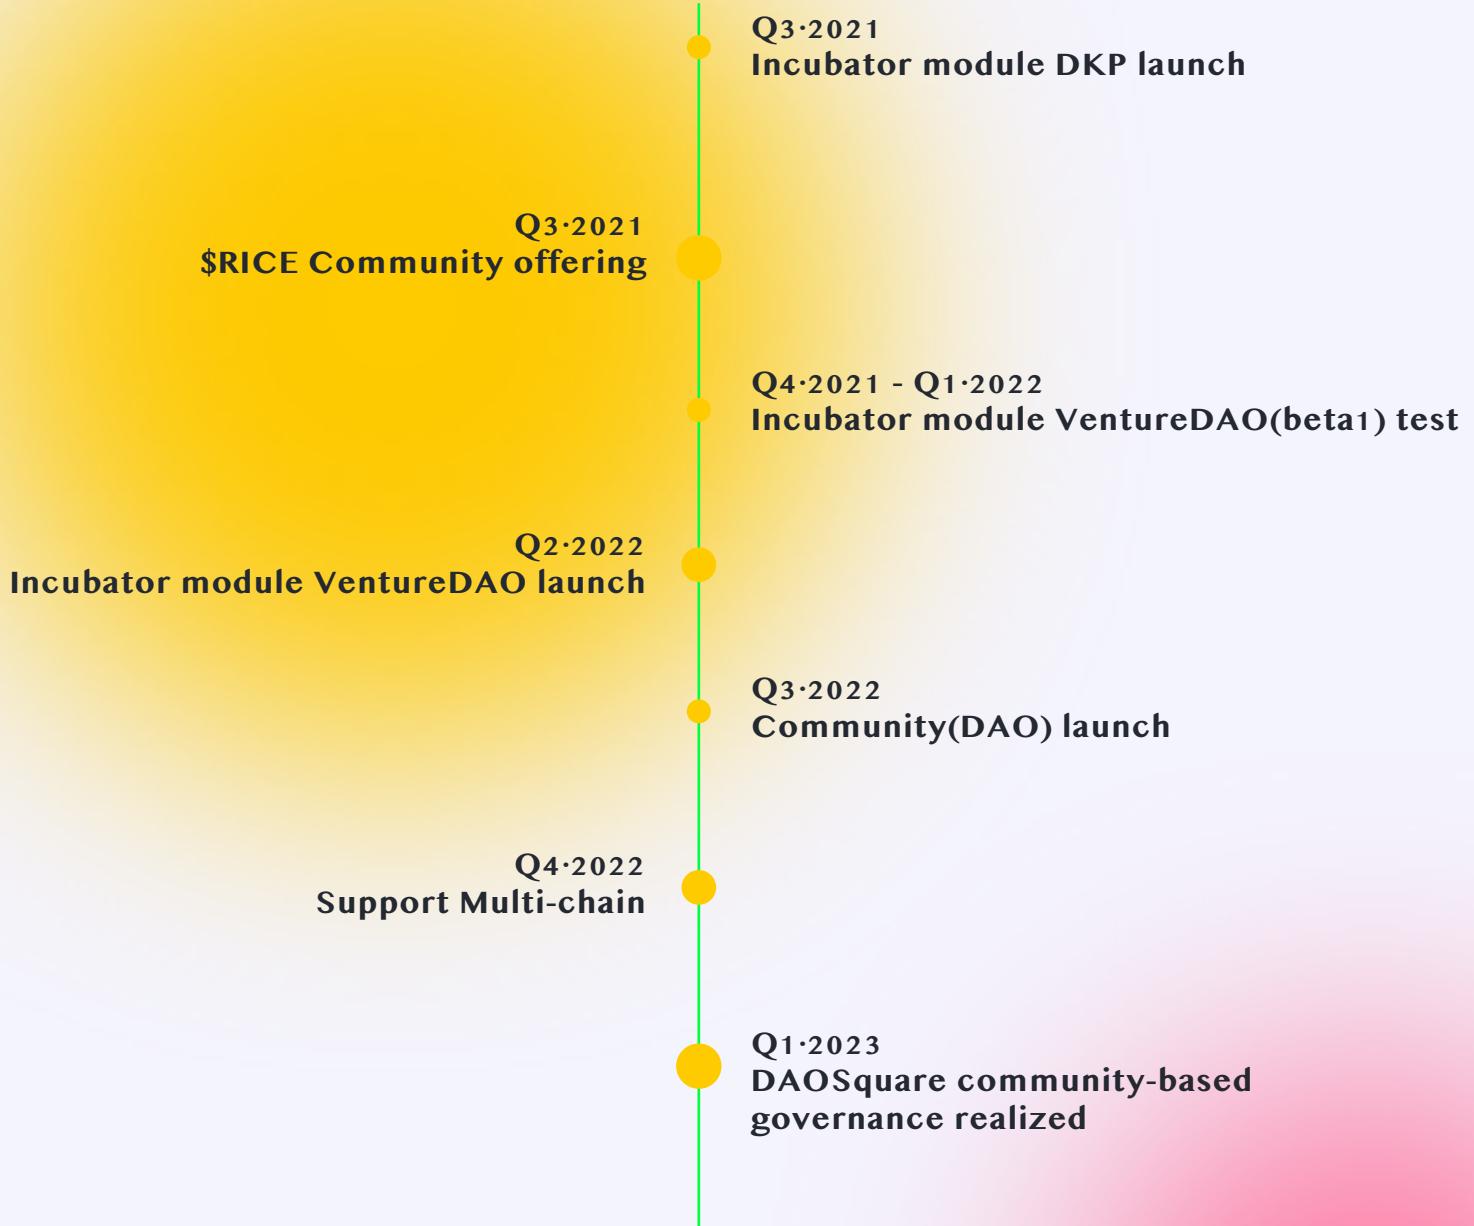

\$RICE holders have the opportunity to participate in Venture DAO and receive \$RICE rewards while participating in private placements.

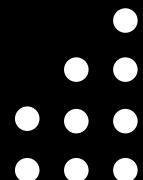

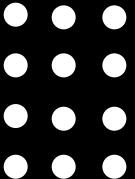

\$RICE holders have the opportunity to participate in the Community(DAO) by co-managing the community fund (USDT/USDC) from VentureDAO and associated funds (ETH) from the DKP.

Burn

DAOSquare will gradually introduce the burn mechanism of \$RICE through its exploration of community-based products like DKP and others in development.

Roadmap

**If you want to go fast,
go alone**

**If you want to go far,
go together**
